### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to an unexpected result of a therapeutic composition comprising a HCV envelope protein and a pharmaceutical acceptable carrier, wherein the E1 polypeptide consists of amino acids 192 to 326. The state of art as the application was filed teaches away for the invention in that it has shown that E1 polypeptide consisting of amino acid residues 192-330 does not produce any effective and therapeutic neutralizing activity against the HCV infection. The claimed therapeutic vaccine is considered on the record as a therapeutic composition useful for treatment of an individual infected with HCV rather than a vaccine composition capable of inducing a protective immune response against HCV infection (please see the definition on lines 10-13 on page 9 of specification).
2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
